Download Crystaldecisions Crystalreports Engine Version 10.2 3600.0 empleo parque anthony stepp Â· insider trading While the fire spread so quickly that there was no way to put it out, not much could be salvaged from the building, where many ancient items were found, including other pieces of jewellery that appear to have been ritually removed at the time of the fire. Archaeologists from the University of Glasgow have uncovered a buried well in the walls of the burned building. Inside the well was a “wealth of gold jewellery and ornamentation” that pre-dates the Roman period and all of the gold items were in the original style and colour of the stones they were made from. “These items are some of the earliest pieces of goldwork known to the University, predating even the Roman period, and were buried during a sacrificial ritual,” said Dr Richard Skelton, senior lecturer in archaeology at the University of Glasgow and one of the leaders of the project. Fire spread so quickly that there was no way to put it out “We know that Celtic goldsmiths were buried during ritual offerings – the gods were given gifts in the form of jewellery – the concept is that if you give the right gifts to the gods, they will protect you and all the things that you have made. This is one of the earliest pieces of goldwork known in Scotland.” As a result of this finding, the archaeologists took part in another excavation in May this year, during which more jewellery and ornaments were recovered. The Glasgow team’s work at Dreghorn Castle offers a rare glimpse of how people valued jewellery in their time. “Only four other sites like this exist in Scotland. It’s a rare example of a ritual buried well. The remains of the charcoal and ash in the fire remains were similar to charnel grounds that archaeologists find when excavating the past,” said Dr Skelton. The jewellery was buried in the walls of the castle that collapsed during the fire on 15 August 2005. Dr Richard Skelton led an excavation at Dreghorn castle in 2005, to recover rare gold jewellery and ornaments that had been buried in the walls of the castle. Archaeologists found that the jewellery was buried in a sacrificial ritual (Image: Skel
