It was originally developed and released in December 1982. The word CAD stands for computer-aided design and the term is sometimes abbreviated to CAX. However, Autodesk generally uses the full term CAD and abbreviates it to CAX. Originally, CAD stood for computer-aided drafting, but the name has evolved to include any type of computer-aided design. Many of these products also include drawing or graphic design tools. AutoCAD is an example of a CAD program. The first CAD products were developed and sold by major manufacturers of computer hardware. For example, Hewlett-Packard released the HP 2200 series of computer hardware that included a CAD/drafting application called HP Eagle CAD. In 1975, the name CAD was first adopted by a separate group of researchers at University of Southern California. They originally created a graphically based object modeling and transformation program. The program was called CADD, and it is considered to be the first CAD system. AutoCAD is one of several CAD software applications that are based on this software. AutoCAD History and Evolution Before 1982, commercial CAD applications were mostly developed on mainframe computers with internal graphics controllers. The CAD operator (user) worked at a separate terminal running the graphics program. The mainframe computer controlled all the graphics functions. For example, the operator could work with one drawing at a time on the mainframe monitor while drawing the next one. The mainframe computer would move the cursor around the screen, draw the lines, and define the dimensions. To create an elevation or three-dimensional model

Page Thursday, March 8, 2011 Green Acres, 1953 On its 1953-54 television season, the network aired this TV production called Green Acres, starring Larry Potter and Donna Reed. Much of the series was filmed in the real-life rural community of Texas known as Green Acres. The Green Acres theme park was actually based in Long Beach, California. What I particularly like about this show is how happy Donna Reed looked. She was a plain girl back then, so it was a big deal for her to be cast as a romantic leading lady. Before we head into the future, let's spend a little time in the past. This blog started as an outlet for whatever I felt like writing about during a very dry period in my life. Since that time I've written about everything from the films of John Hughes to books I've read. I've also started a number of different blogs in different genres. Putative role of phospholipase D in MDR phenotype of HeLa cells. Overexpression of P-glycoprotein (P-gp) is a common characteristic of multidrug-resistant cancer cells. The mechanism of multidrug resistance (MDR) has not been established yet. Here we demonstrated that phospholipase D (PLD) activity and production of inositol-1,4,5-triphosphate (IP3) in HeLa/DX cells were twofold higher than in HeLa cells, while PLD1 expression was not altered. A PLD inhibitor, edelfosine (CAS 77953-97-9) decreased intracellular IP3 and the level of P-gp in HeLa/DX cells. BSPH1, a synthetic analog of lysophosphatidic acid (LPA), enhanced the transport of adriamycin by reversing the P-gp-mediated MDR. This was confirmed by blocking P-gp function by verapam

Open Markup Assist: Import drawings from a Windows Clipboard, Word, Excel, PDF, PowerPoint, Google Docs, or jpg image (using the Import button). In addition to a number of new Windows Clipboard sources, the Import dialog supports the following "Import from the Web" sources: Sideways Media, a Canadian company which provides collaborative CAD solutions, has been successfully using Markup Assist for their own large CAD and design projects. "Markup Assist has enabled our company to reduce the time it takes to make edits and thus to save a considerable amount of money," says Tanya Turner, a Computer and Systems Analyst at Sideways Media. "For example, we are able to save over 3 hours per week per designer. We also benefit from a variety of other workflow improvements, such as the ability to quickly select groups of edits from across the site," adds Turner. How can Markup Assist save time and money?
