

## [Download](#)

First, close the folder lock and show the hidden file, and the system hidden file, select the "Tools" menu and click "Folder Options". Select the View tab. In the Advanced Options group, select the Hide protected files check box. Now you can close the window.

Now you need to copy the folder from the C:\\Windows\\ folder, archive it and rename it. To do this,

---

double-click on the folder name to open it. In the window that opens, select a folder in Windows\System32\ and place a new folder named vcredist\_x86.exe there. Copy the file vcredist\_x86.exe into this folder, and from the folder C:\Windows\System32\ the folder vcredist.
