## Efficient Notes Network Torrent [32/64bit]

Efficient Notes Network enables you to share, modify and control data from your desktop. The software gives you the possibility to create memos, notes, group them in your own categories and distribute them to a specific team, department or even the whole organization. You may set the permissions and specify the list of the users who have access to each entry. After this, you can see a report that shows the details of each note, including the moderator, the notes belonging to each category, the date of creation and modification, the author, keywords, their text and other information. Your notes are instantly displayed on the desktop. You can also attach files, which are displayed in the list on the left of the notes. The search function enables you to find the entry you seek without the need to navigate the database. You can select from two or more equalizing rules, such as "User=Bob", "Text=" or "Category=". Each team member can control the search for notes belonging to his or her own categories, for example, "Category=A". The search results will be shown in a separate file. Furthermore, you can filter the search by clicking the set of tags in the "Tags" column. Once you have found the entry you want to modify, you can edit it and modify its information as you see fit. You can insert the formatted text or the other text, manipulate the font, size and transparency, or click the save icon to update it in the database. You may also use any of the other functions, such as copying or printing. All the records in the database can be maintained in the list of categories. From the left-hand side, you can select the category you want, whether public or private, modify the category and use the mouse to sort the notes by their category, creation date or author. You can see the report that displays the information of each category, including the notes created or updated. You may also export the database by printing it and files in the "Export Notes" window. Your data, notes, categories and the contents of each list can be safely archived

---

for safekeeping or security reasons. When you export the files, you can enable or disable password protection. For each item, you can limit the number of repetitions. In addition, you can group the various notes in the "Group Notes" window by their categories, modify or add them in each group

## **Efficient Notes Network Download For Windows**
