
Fatal Twelve Mini Voice Drama Download Setup

FSpeech/Voices/Speechbanks (formally called Accent) exist in every Worms game. Worms have different voices and can be customized in most games. If you use non-native voices in the game (for example, the voices of your friend), then they sound unnatural, and in some places they even begin to work incorrectly. For example, if you say "Fuck you" in a game where your friend's voice is not present, the result will be "Fuck you" from the worm. So when using these "voices", make sure you have your friend's voices installed. You can download the VoiceBanks for Worms Armageddon and Worms World Party from the Worms.com website.
