A woman, accompanied by two midwives, gives birth in a small village in India. This is the first real pregnancy and the first real person in the history of mankind. For science, this was a very interesting case, but something else is more important to me. It was a specific woman, I personally do not know her. She was just a woman, they couldn't even call her by her name because she was pregnant. Nine people helped her. If a situation arises when each person has to do all the work in the profession, then it is very difficult. But women do it well - someone vacuums well, someone does laundry, someone cooks, someone cleans. Unlike men. So why not help a pregnant woman? And I created a site on the cycle "Woman and Pregnancy" and began to look for those women who did 10 people a day. After some time, I wrote this cycle and made 7 copyright sites. I enjoy making women do their jobs. There are people who want me to write articles for them, but I can't give them that much time. I write several times a month and give parting words, and then I write that I have not finished yet. From the very beginning of planning, I set a condition. No coding and pills. I want to have a healthy baby. I completely gave up alcohol and cigarettes. For me it is important that the child was born healthy. May I never see him, but what about
