to switch stations, displays clock, and radio stations, it is a tray radio.

Program running: The program starts and runs in the tray icon. The tray radio is a live control which enables users to view and control the radio station by clicking the radio station list. Program running: This program is a free application. Evaluation and conclusion To sum it all up, Tray Radio could be suitable for the user who has not had the chance to use a station-recording program, or is looking for a simple way to record stations. Keri is a time-saving tool for artists, designers and photo & video

---

editors. The program offers a rich selection of tips and tricks that enable users to work faster, create better designs, showcase their creativity, and improve their work. Keri will help you find out the best way to prepare your images for print, website, video and social media. The utility boasts a clean and well-organized interface, and aside from the exceptional selection of features, it also features a live preview feature and real-time editing. It has an excellent list of tools that can be used to create designs, but the main goal for the program is not to help you create something you'll be

---

proud of, it's to save you some time. Interface: Keri's user-friendly interface is essential when dealing with a time-saving application. The program sports a clean and visually appealing display that highlights features and lets you browse menus, templates, and materials without going anywhere. Program running: Keri runs in tray mode, which means it will not take up any system resources and will have no impact on your system performance. The utility supports a real-time editing feature that gives you a chance to adjust every aspect of your picture as you

---

work on it and view the progress.

**Program running:** This program is a free application. **Workflow:** The program's main purpose is to enable you to work fast and efficiently. This means that it can indeed be useful for people who work with a great deal of pictures and designs, as it can give them an edge. However, the program can only do so much,
