In May 1997, Autodesk acquired the company Insight Technology, which included a vector graphics rendering engine used in AutoCAD since its introduction in 1982. Insight Technology, now known as "iDesign" is capable of exporting CAD drawings to the Portable Document Format (PDF), as well as to Microsoft PowerPoint, Microsoft Visio, and Adobe Illustrator. In May 2000, Autodesk acquired Paracad, a developer of vector-based software. Paracad's VectorWorks was later integrated into AutoCAD. In July 2005, Autodesk announced the end of AutoCAD Map 3D; it would be replaced by a component called AutoCAD Map-Draft, which integrates the functionality of Map 3D with AutoCAD DWG and DXF formats. On August 4, 2010, Autodesk announced AutoCAD 2014, which is a complete new release of AutoCAD and is aimed at desktop and mobile users. The release of AutoCAD 2014 is compatible with Windows Vista and Windows 7. In 2014, AutoCAD was named "Most Innovative Design Product of the Year" by the Association of Computing Machinery (ACM). History [edit] The AutoCAD CAD system was developed by Autodesk as a desktop application for microcomputers with graphics controllers. This was similar to CAD programs produced by other developers. In 1982, Autodesk introduced AutoCAD, an app that ran on the Altair 8800 computer that had an onboard graphics controller. AutoCAD was a slow, low-resolution program with no computer-generated graphics. In 1983, Autodesk introduced AutoCAD II, which made the program more similar to the first-generation CAD programs and included the first computer-generated 3D models. AutoCAD II was a standalone product, but the earlier version could be used on PCs with the PC Add-in Card, a serial device with an onboard graphics display, which was cheaper than an add-in card for a separate computer. AutoCAD II was the first commercial CAD program to integrate vector and raster graphics. On December 18, 1992, Autodesk was acquired by a consortium of investors, including Sanyo, in a \$1.2 billion deal. This had no effect on AutoCAD, as Autodesk has always been a separate company from Sanyo. The AutoCAD 2000 software was released in January 1997, and was available for the Altair
