You will be able to continue working without saving each time. Hope this helped!

The number of Americans filing for unemployment benefits fell last week to near a 45-year low, pointing to a continued tightening of labor markets that could begin to put pressure on inflation. Initial claims for state unemployment benefits dropped 12,000 to a seasonally adjusted 219,000 for the week ended April 18, the lowest reading since mid-November 1973, the government said on Thursday. Economists polled by Reuters had forecast claims falling to 226,000 in the latest week. In the prior week, claims fell by 14,000 to 215,000. Claims have now been below the 250,000 threshold for only four weeks, a threshold that is associated with labor market slack that could put pressure on inflation. Last week's claims data covered the survey period for the April 18-24 period. Claims for the prior week were revised to show 1,000 more applications received than previously reported.
