Xiaomi Redmi Note 5 Pro Wifi Not Working Fix Mi Note 5 Pro WiFi not working fix wifi and bluetooth not working 100% Fix Reply picture 100% How to Repair Xiaomi Redmi Note 5 PRO Wifi Xiaomi redmi note 5 pro WiFi not working fix wifi and bluetooth not working 100% May 31, 2018 - Tap on Reset - Go back to the main menu and then press Power Off - Go back to the main menu and then press Reboot systemNow your gadget will restart. (Pressing the power button again). Xiaomi Redmi Note 5 Pro WiFi Not Working Other Solution: Or can use this tool or device It will recover the contacts,pictures,game data,and themes of your device. or You can try this tool, It will recover some data, but will lose some data. Update: Other Or Using "Mi Flash Tool" this tool will fix Wi-Fi,Bluetooth,Sensor,Rotation problem Mi Flash Tool is a tool, mostly used for flashing ROMs. You can directly flash custom ROMs using this tool. It is not the official tool for flashing ROMs. Don't try this tool and then expecting a Mi Flash fix. This tool worked for me. It will fix Wi-Fi,Bluetooth,Sensor,Rotation problems. But If your gadget still can't connect to the WiFi then please try the other method. Q: i want to show alert dialog box when item is clicked in sqlite database I have a sqlite database that the items are inserted into. I need to show an alert dialog box when an item is clicked. Here is my code:

```
public void OnClick(View v) { // TODO Auto-generated method stub selectedid = cursor.getInt(cursor.
```
