KEYMACRO is a keyboard macro program that offers two modes of operation. The most obvious, standard one is meant for people who use a standard keyboard, but do not want to spend a fortune on multi-functional peripheral. The second, specialized mode is intended for people who have multiple keyboards, and require a few shortcuts on the machine, a hardware solution is not required for the purpose. When creating a macro, you should know that you can easily set the app to repeat a sequence, pause the macro, output your data to the
