Let's entertain ourselves with 4 slots, you could use the player's left hand to play instrument and feel the real sense of harmony, or press the power button and generate a lot of combo hits, and you could use the player's right hand to play beats and lead the drums. There are 2 types of drums in the game, the standard drum set that most people have, and the electronic drum set that is much simpler, but can also be tuned with other instruments. You'll have an instrument or an instrument+snare in each hand to play with, and both types of drums are easy to hold. Moreover, you could even try to change the key of the instruments, it will keep your hand on the same "power" button, which is to stay on the notes that are to be played, but change the key. You will be able to control the drums with the middle button too, along with the speed, and you could adjust the volume (from 3 levels for each drums) with the left and right button. Through one hand press, you could produce the combo hits you want, that is, you don't have to change instruments back and forth, just pressing "power" button and "bass" button at the same time, and hits will appear. Furthermore, there are different difficulty levels of drums, we support the headset that has the pop filter, but we just simply adjust the volume, and there is no change of the performance level! As you keep making combos, the music will become more and more fantastic. Also, you will have the chance to play solo all the time, and you could also play with friends and compete with each other, that is, you won't stop this rhythm world!

- More than 30 minutes of content (all tracks, bonus content, full content, etc.);
- Full achievements;
- 2 types of drums and 4 different difficulty level;
- Experience the "never-stop" drumming journey;
- Keep your rhythm worldwide and get close to God;
- You can share your performance via Facebook;
- In-game map: Your performance could be saved there, and you could revisit all your previous hits;
- One hand design for more power and fewer fingers;
- World elements (trees, rocks, animals, etc.);
- Very flexible player control, no need to change drum, or press the

Aboard the spaceship Mr. and Mrs. Balloonski can jump into the astral dimension where everything is impossible! Horrifying powers, danger and a lot of crazy happenings await! A typical game situation: Playfully you put up a balloon in your hands and look at it. It floats and you are happy with it. And suddenly, someone comes and takes the balloon away. Or someone calls it "Mr. Balloonski" or "Mrs. Balloonski" - is it ridiculous! And then you think about a gift for your friend. And suddenly, you are called for your mission. Mr. or Mrs. Balloonski will take you and you will fly to the balloon chamber of your spaceship. You will see countless balloons. It's a magical life: from a balloon you can fly to the stars. You never can see the sun. When you want to take off you are sure to experience the horror of what happens in the air. You will also learn a lot about chemistry! There is an equivalent in the game to the "yor" game. For example, a face can rotate 180° around its axis. A window can become a door and a door can become a window. And you can fly through the chimney. All these things are possible and you have to use them. The game is easy to play: What will happen in the balloon will happen to you. The player can get into an infinite loop of balloon, inflation and flying, or also once in a while you will be in very adverse situations and will have to use all the stunts you know. Because of the many and extreme situations, the game can be difficult to play and a lot of fun. ?? by Chad Nagle (Saskatoon, Canada) The door was gone, I just knew it. It had disappeared behind the final heating circuit on the control panel. It must have been something that became dislodged somehow, because the panel now has a permanent crack in it and i can hear the scrape of weather stripping against the heel of a kitchen chair. The fixture has been located and will be replaced, but not until this weekend. So, i had a couple of days off and decided to use up my entry on Whatz That. It seemed very fitting, too, i thought. The Door was first used in the 1980's. At the time, the Amp department was young and eager, so i was happy to get the gig. It seemed to speak to me somehow, and i felt i had to have it. I had a bunch of amps under the door, and the meter box held a couple more. The room was too dark to show off the room lighting that also resided under the door. One of the amps worked, but its output level didn't seem as bright, if that makes any sense. In the end, i nicknamed the room "The Purple Room". It was great, though. Which brings me to the story. I am 61 years old, and this (the Door Of Ice)is my last toilet. Shortly after i started at the Door last Spring, i was invited to a party at the Gerald M. Bruce residence. This was a little social trap i hardly needed to fall into, but it happened. The Bruce's, are the owners of the local audio store, Wayz & Sound. What i learned about them later was that they had a huge pinewood room in the back of their house. It was a great place to play audio, wine, eat chicken, and listen to sports on the floor to ceiling plasma screen television. It was a real party, complete with the "chuck wagon", donkey races, and the chase after the new video game "king" every year. That year (1999), the "black dog" struck, they say, exactly once every 5 years. I heard the whole thing, and i think i could spot the one o'clock stroke right from the set up. This was one of those memorable entertainment experiences. We all felt like young kids again, the day before christmas. That was actually a good thing, because they had "mandatory game play" for the guests before

Now introducing 'Crazy Farm'! This game contains three games which can be enjoyed with 2 devices, VR and Smart Devices. 1) In 'Protect the farm' mode, the VR user hits an animal with a broom, and the Smart device user needs to press a button. 2) In 'Protect the truck' mode, the VR user needs to throw apple bombs to prevent the animals from reaching the truck. The Smart device user needs to hit a move button repeatedly to avoid an apology bomb and acquire an apple. 3) In 'Protect the barn' mode, it is necessary for the VR user to hit the animal flying to the barn using two brooms. The Smart device user needs to fly in a safe direction to avoid the farmers' broom and get an apple. The rules of competition are simple as follows: - Start time is 7:00. - If the second is a mobile user, its score is 1/5 of the VR user's score. - If the third is a mobile user, it is 4/5 of the VR user's score. - The game will be ended if the VR user can not win in 30 minutes. In addition, if the VR user defeats the first opponent in a certain period, the mobile user will be ranked first. (If both users beat the same opponent, the VR user will be ranked higher) * The first mobile user will not be ranked if the score is lower than an animal, and the game will be ended in this case. The performance and sound will be supported from different devices. References: 1. How to play: 2. In-App purchase (IAP) For those using in-app purchases, users can buy various game resources, such as the app, the character, etc., using IAP. In this case, the developer has to select which one is suitable to use, and must note that the amount of cost and the development time differ greatly depending on which method is selected, and thus the developer must discuss whether it is possible to use. There are also various points where the game cannot be used or runs out. It is recommended that users select a game that can be played without any restrictions.
