“A fantasy world that combines real-time strategy and role-playing.” If you’re looking for the fantasy action RPG where only the powerful are able to survive, you will find it in Tarnished. A new setting will be announced in the very near future with a completely new game. The story begins with a war that engulfed the world. The hero who called it to stop was killed while still possessed by the world’s evil forces. Thus, the fate of the world was sealed. In the world of Elden Ring, a new war began with a single goal: to defeat and control the evil forces that curse the world. “A World that Shapes the Destiny of Others” Tarnished is an action RPG where it is not just about you, the player. The world, the monsters, the NPCs, the heroes, and the newly introduced NPC allies all work together in what is called an “unmapped RPG system.” “It’s like being part of the story.” What is it that draws you to a new world? A new story? Well, to begin with, you are living in the world with your partner and hunting monsters to make the world a better place. The difference is that while your partner is a normal human that gets in your way and makes you do quests, the new people you encounter are new kinds of characters that make you look at the world in a completely new way. The story of your partner, as well as the story of the party, intertwine, so you never know what will happen next. As you progress through the story, the world grows ever more complex, and it all leads to a single goal: the defeat of evil. “A world that you have never seen before, but are part of.” A fantasy action RPG where it is not just about you, the player. In the background, an event is taking place. Friends and allies from the very beginning of the game appear with stories of their own. The world is living, breathing, and growing as a result of the events of your party. As a player, you will live in the world alongside the heroes, the monsters, and NPCs. “It’s like being part of the story.” In the game’s story, the
