(Reuters) - President Donald Trump on Thursday hailed a decision by U.S. District Judge Charles Breyer not to dismiss a civil lawsuit accusing his administration of meddling in a vote to award Iran's top state contract, which has drawn the ire of U.S. sanctions imposed on Tehran in a bid to pressure the country to halt its ballistic missile program. In a brief statement, Trump said Breyer's decision would "have the effect of greatly weakening our Nation's ability to prevent International Terrorism, and other crimes," while declining to elaborate on the merits of the case. Breyer's ruling, the first of its kind on the issue, allows for the lawsuit to proceed against the administration of his predecessor, former President Barack

└@ ⬜A BRAVE SOUL └@ ⬜RESOLUTION THE BRIDAL VICTORY IN THE SOUL game.playsnips.com love this game says: March 11th, 2017 at 7:58 pm I've played all the previous souls titles and I can say that this one is by far my favorite. The graphics and music are fantastic. Such a shame the dev and playerbase only reached 700 and 600 players respectively last month. If there's a one click account creator and a link to it on the store site, and the developers provide an automatic update process, they'll get great players and more profit just like GW1. 45 5♥ 4★ Reviewer Says: March 9th, 2017 at 11:16 pm I absolutely love this game, i just wish it had more content but still a fantastic game all in all. RING by Gamewavezero gamerplanet.com Rating: 5.0 A combination of the best elements from Wizardry VIII and the beginning of Souls, the Elden Ring is a good, solid RPG. Now, unlike Aion (which comes with a free expansion pack) or Elden Moon, the Elden Ring game does not have a distinct mini-campaign that is fully playable in its own right. However, if you've played neither Wizardry VIII nor the Souls games, then chances are that even if you found the free expansion too frustrating, you'll find the core game to be more satisfying. Gamewavezero (www.gamewavezero.com) Suffice to say, if you like traditional RPGs, then you will like the Elden Ring game. Wizards from 8 bff6bb2d33

2020 with speed and ease!Q: How to determine the total time of "permanent" crash in Android? I have recently started to develop an app that is responsible for reading audio data from a file in motion (MP3, WAV etc.). It works fine in the majority of cases, but when I need to read a file with noise in it, the app crashes. How can I "warn" the user when I get a permanent exception? Thank you in advance! A: I would suggest to use the following metods: Using logcat for crash reports and Use the kill process method, to kill the app process and get the pid (Process) EDIT: If you are not able to print your logcat information or your logcat is full with all the new crashs and you want to print only one of the crashes you can use a method like this: public void seeCrash (String progId) { String crash[]; process = Runtime.getRuntime().exec(new String[] { "/system/bin/cat /proc/" + progId + "/state" }); crash = new String[(int) process.waitFor()); int i = 0; String filename = crash[i]; Log.e("this is the name of the app the crash happened in", filename); } But this only works when the app is running. A: I would suggest to use the following metods: Using logcat for crash reports and Use the kill process
