What's new:

Long ago, when FMV games could get away with puzzles that were hard but not impossible to get through, SoftPornGames.com was among a small group of video game porn sites. Now that entire genre has fallen on hard times with the advent of the new Doom 3 engine. So in addition to a few new new filthy pictures you'll find below, we've dug into our archives to bring a hefty assortment of dirty games we posted over the years. Let's begin the ritual now! This time around you play as a slick-talking young swashbuckler whose pants fill with water at random intervals. While his lady friend is away on a quest, Larry has to go to work... but it turns out that job is a stripper's: Hank has just stolen an ancient map that reveals the location of the Gates of Fornax, leading in to a mystical ancient world of evil Moai. Larry finds himself whisked off to the underworld and must defeat all of the monsters in order to save his damsel in distress who has been kidnapped by the devil himself: You wake up in a cabin in the woods with no memory of how you got there. Follow the impossible quest signs and you'll end up with a neon-spewing alien spaceship, a naked beauty, and a giant titty alien. You've uncovered a conspiracy-will you get the girl? Find the puzzle: This time Larry is one of "the special girls." The rest of the models are unpolished in the least bit so you'll need to sell yourself on this site in much the same way that you do with the ladies. This porn adventure genre game is probably one of the best designers of Boyfriend Adventures. Princess Peach is kidnapped and you're the man who has to rescue her, and here you can see one of Larry's most famous in full 1080p. And yes, HE has the ginormous...um...tentacle. After fucking five different women in front of the big, bright, TV, Larry hides them in a closet. Women are found later. Poor Larry, and on top of it he has a frog on his head that's constantly spitting in his face. And the women are just as pissed off. Well, apparently you're not the only one that can play with fireballs. In this porn game you'll

be visiting enemy bases where you'll find a hot chick and a monkey on your way to

RPG Maker MZ - Fantasy Tiles - Elves is a theme pack based on popular monsters and character in the game "Tiles RPG", an independent fantasy RPG that was released for free on the PC. As always, it comes with new textures, weapons, and tiles, along with new tools and a pre-made map of Eshin's Castle. * Important Notes: - The pack includes a version of the game whose starting chapter is the first chapter, and has no chapter selection screen on start up. The pack also includes text for each of the 4 main characters. - All sprites have been resized to new 8×8 tiles, so if your game will load 8×8 tiles, you should get a little more space to work with. - If you have an older version of the game, the sprites are actually 144×144, although the character should only be 128×128 for 8x8 tiles, which should be enough to fit all characters. Recommended: Flamers will constantly need to renew their heat at the Forge. Flamers can renew their heat at the forge by spending what you have at a forge on a piece of red cloth. As you use these pieces they get reduced in volume and take up less space. For example, to renew 25 pieces of

cloth you would pay 9 of your own weapon to place the cloth into the forge, and 6 of your own to move the forge to the new position, or, you can use 6 of your own weapon, and 9 of the cloth.
