The player will be searching, bouncing off of objects, and climbing up ladders, while solving puzzles and collecting items (some of which are non-essential). The game features over 10 unique rooms, and has a variety of items to collect. You can access rooms with a nifty elevator system and you can also ride the elevator up through many floors. Nuestra Señora de Covarrubias, under the command of Álvar Núñez Cabeza de Vaca, a vessel that had been trading with Native American tribes along the lower Rio Grande river in New Mexico, inadvertently sailed ashore at **Cuba** during the height of the worst hurricane in US history. Nurtured by the friendly people who lived along the shore, she remained out of the water for the next 30 years and became one of the best-preserved of the lost ships. When the popular historical fiction of Jules Verne was told, she was given a much fancier past but, with sturdy duty-free engines and her modest 125 feet in length, proved plenty seaworthy. She was periodically refitted as a communications vessel and a Coast Guard training ship, and finally sunk in a coastal cave by a civilian divers in October 1940, proving that fact rather than fiction. **ALWAYS** _Renamed_ USS _Leon_ _Launched_ 15 September 1963 _Commissioned_ 25 December 1963 _Decommissioned_ 20 January 1982 **INTERESTING FACTS** • _Name: USS Leon_ • _Home port: Norfolk, Virginia_ • _Length: 169m (558ft)_ • _Beam: 38m (126ft)_ • _Draft: 7.3m (23.5ft)_ • _Displacement: 10,200 tonnes (19,772 tons)_ • _Speed: 18 kn (31knots)_ • _Range: 14,000 nautical miles (24,260 miles; 39,488 km)_ • _Endurance: 65d (9 hours 0 minutes)_ • _Tonnage: 356 nautical tonnage_ • _Propulsion: twin diesel engines_ • _Armament: 4 torpedo tubes_ The exterior of the USS Leon. **USS GEORGE WASHINGTON** The second of the six **nuclear-powered carriers** (the first was the USS _Midway_), the George Washington was the largest aircraft carrier in the world when launched in 1976. The game is all about a world, where a bloody war is going on and a guy called the Wolf is leading the army. The main character has been chosen to follow him. The main character's name is Rin, a young wolf with evil eyes, and a whole world at his disposal. This is the first game with RPG Maker MZ and MV, so please be patient as we're still learning the ropes. When you start the game, you need to be armed with a spear that's called a Dragon Spear. Using it is up to your choice, so you decide what to do from the get go. Let's take a tour! Rin's Life ~~~~~~~~~~~~~~~~~~~~~~~~~ The game begins after Rin wakes up in the "Dusty Camp", an encampment somewhere in the south. The first thing you'll need to do is stock up on your supplies. Collect 6 eggs in the morning and 12 in the afternoon, then press "A" to store them away. However, you can't store more than 40 items. Now you need to choose whether you want to stay in the camp or move out. You have a choice of 5 different variations, so let's take a look. MAIN CAMPGROUND In this variation, you won't be able to find the main encampment. You'll be camping on the Desert, which makes the game play easier, but will take you longer to catch up with the main party, so do your best in the Desert... but remember that survival is your main priority in this game. RIN'S FIRST ONLINE GAME In this variation, you will be able to join in the main encampment. But it takes a while before you meet your friend Rin, and you'll be camping in the Desert. CHIBA ENCLAVE In this variation, you can choose one of the 8 limited areas at the start of the game. You need to find your way back to the main camp, but it's safer to camp in the area, as you won't be surrounded by the clutches of the monsters. NINJA ATTACK In this variation, you will be in the main encampment and you'll be standing guard at the walls. You can't move during this variation, but fortunately, the monsters won't ever attack you. SHMUP In this variation, you'll be playing as a Rogue, and a dragon will provide you with a whole new challenge. As the name suggests,
