What's New In Spherical Panorama SP_SC Converter?

It supports most of the popular formats for panoramic images (JPEG, GIF, JPEG 2000, TIFF, TGA,...) The original image data (without any compression) is stored in a large sized file (laboratorial useful size up to 15 MP) and usually compressed in the most of cases. Original image data is displayed in the converter as a splash screen, then the user can select an original image file. When the user select one of the images, the converter will generate a web page for a large sized panoramic image with a 1:1 aspect. Full details of the contents and general options can be found in the Help file of the converter. Web Page generation of a Panorama (Largest size of the Web page is : 1 MB) Consolizing dynamic zoom of the web page to : 800x400 inches Generation of the Web Page with a 1:1 aspect Spherical Panorama SP_SC Presenter Description: It is a presenter to run a Spherical Panorama SP_SC Converter. 1. Presenter This version supports Windows XP and later versions. 2. Conversion Types Convert only one image: If you use several panoramic image, you can choose an image by right click on the image.
