- . Screening for functional
ovarian cysts with pelvic
ultrasonography,

endovaginal
ultrasonography,
transvaginal scanning, and
Doppler ultrasound, and its
effect on fertility. To
evaluate the effectiveness
of ultrasonographic
screening for ovarian cysts
in infertile women. A total
of 178 consecutive infertile
women who presented in
our outpatient department
were examined by pelvic
ultrasound (P.U.),
endovaginal ultrasound
(E.V.), transvaginal
scanning (TV), and
transvaginal color Doppler
ultrasound (CD) to

determine whether or not they had an ovarian cyst.

Screening by pelvic ultrasonography and endovaginal ultrasound.

The success rate of embryo implantation was compared between women who received treatment for ovarian cysts and those who did not. Of the patients examined by pelvic ultrasonography, 75 (42.4%) had ovarian cysts; of those examined by endovaginal ultrasound, 40 (22.4%); and of those examined by TV and CD, 135 (75.8%) and 131

(71.9%), respectively. Ovarian cysts detected by TV and CD were also detected by pelvic ultrasonography and endovaginal ultrasound. The success rate of embryo implantation was similar in women who received treatment for ovarian cysts and those who did not. The diagnostic efficacy of pelvic ultrasonography, endovaginal ultrasound, TV and CD was similar for the detection of ovarian cysts in infertile women. When in doubt, ask them if they would like a cold beer.

That's always a good way to find out. 1) Yes 2) No 3) Yes & they would like a beer 4) No & I don't like beer 5) Don't Care 6) No & I would like a beer Of course that's not necessarily the truth - for instance, they may just tell you the truth 0cc13bf012
