Improved Face, Body and Hair Models Players will be able to make adjustments to their game face, hair and body, and players will have a full frontal range of expression, meaning they'll be able to make subtle changes to their appearance. Players will also be able to adjust the various creases and wrinkles, to make them more distinguishable and have a more realistic appearance. FIFA Mobile – The New #TrueBill App FIFA Mobile has revolutionised football gaming, allowing fans to connect with a real-life team and compete with their friends and family in a series of fun and quick-fire local matches. Using AI that learns from each player, the app's mini-games will allow you to play against an opposition that adapts to your style of play, always working to beat you or become you. Vote for Your Favorite Player Fans will be able to create and shape a player that's true to their football character, and vote for them to unlock unique player features and properties, including new training drills and full-season kits. Bring the Vision Back to Free kicks One of the most exciting parts of FIFA 20 was when you got your first free kick of the game: the opportunity to start over from the beginning, to take on a different look, or even a new goal celebration animation, all in a bid to change your fortunes. In FIFA 22, this simple change gives fans the ability to take control of their free kicks – whether it's to win back possession, or start over from the beginning after a goal. FIFA Ultimate Team Tokens Turbo Boost Use Turbo Boost to turn the clock back on a current free kick and make sure that your attack has all the room it needs to take advantage of the situation. Kick-to-Kick, Gone! After getting the ball out from the penalty spot, a new feature, Kick-to-Kick, has been introduced that allows you to play a simple, quick-fire 2v2 mini-game on the penalty spot, to keep players guessing. In this new mini-game, your team will defend the space in front of the penalty spot against an attacking team, and a successful pass allows you to score. The attacking team will also receive an additional ability if they score, meaning the teams will always play a different way. Triple Threat With in-

### Features Key:

- FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.
- For the first time in a FIFA release, your friends across the world can be added to your Friends List and join your FIFA Ultimate Team.
- The new Tactics Trainer provides you with the tools to manage every facet of your team's performance. From managing tactics to playing pre- and post-match, the setup of your team is thoroughly broken down into easy-to-understand diagrams with clearly communicated points.
- FIFA Ultimate Team contains over 2,000 players with unique attributes, styles, kits, and more to create the perfect squad for any game mode or matchday. Draft, trade, and manage the best players you can to dominate.
- Release date: 25 August 2017
- File size: 62.5 GB
- **NOTES:** Editor bug where the camera in Player Career Mode will disappear if you use a menu key when viewing the technical viewer (E). Minor UI issue with the QuickStart menu when a new game is chosen.

FIFA is a video game franchise produced by Electronic Arts. The original game was released for the Apple II in 1985. The franchise has had a number of video games and adapted sports game titles. The franchise is one of the best-selling franchises in gaming, with nearly 80 million copies sold. How does FIFA work? The central element in FIFA is the use of tactics and physical attributes to play the game. The core of gameplay revolves around a third-person control system. You are in control of a player and decide what to do, how to do it, and which teammate to do it with. The third-person nature of the game makes it easier to monitor your opponents and see exactly what they are going to do next. You can only control the player that you are given control of. FIFA is a game of control and strategy. And if you've ever played a game of chess, you are already familiar with some of the controls. Every button controls a player's movement, and the direction and angle of their movement is affected by their "mental make-up." So you have to make use of a player's attributes to either win a game, or at least make it more interesting. For example, if a player has a good shot at goal, the controller will typically give you the instruction to move towards the goal. However, if a player has a good dribble, you can get them the ball by moving towards the player, which will cause them to run with the ball. Using these attributes, you try to predict what your opponents will do. You have the choice to either pass the ball or attempt to score a goal. You can only control the player that you are given control of. The game currently has more than 10,000 control combinations. This is largely due to the fact that there are 22 players to pick from and various stadiums to play in. To make the game feel even more realistic, you can change the angle and field. In FIFA, players use individual attributes, skills, and physical attributes to perform and score. They can be divided into two broad areas: active and ball control. Active Attributes These attributes are unique to each player on the team. You can use them for in-game advantages and for more direct control of your on-screen player.
