"Is the following statement true, false or neither?" $x^2 + y^2 \geq 0$ implies $x^2 + y^2 \leq 0$ Is it a correct proposition? A: This is clearly false, as the contrapositive is not true! A: The contrapositive is false. The statement $x^2 + y^2 \geq 0 \rightarrow x^2 + y^2 \leq 0$ is equivalent to $x^2 + y^2 \leq 0 \rightarrow x^2 + y^2 \geq 0$ or the reverse of the above formula is false. A: No, it is false. When we write $x^2 + y^2 \geq 0 \rightarrow x^2 + y^2 \leq 0$, $x^2 + y^2 \leq 0$ does not imply $x^2 + y^2 \geq 0$. Kansas City outlaws minimal battery ordinance Kansas City, Mo., outlaws the use of a "minimal battery," an ordinance that allows police officers to use force if any is necessary to prevent the commission of a felony. The law, which was proposed to the Kansas City Council on Oct. 22, was needed to respond to a legal challenge regarding the arrest and beating of a citizen by police officers. "The proposed ordinance aims to better define the 'minimal battery' so that it will make clear who may legally use the minimum force necessary to prevent a felony," according to a statement from the Kansas City, Mo., Office of Police Affairs. "Arrest-related force ... will be clearly defined and will be limited to people engaged in violent acts," the statement continued. Bob Wenzel, associate professor of law and law and society at the University of Missouri-Kansas City School of Law, said that police officers need to have less-intrusive means of making arrests. ♦

sentence while reading my textbook and found it difficult to figure out the exact meaning of: What's so obvious to you about this situation? I know the meaning of "obvious" is something that is obvious, and something that is obvious to you is something obvious to you. But I'm having difficulty in understanding the meaning of this sentence. A: A closer version of the sentence, as given in the textbook, would be: What's so obvious to you about this situation? The example in the textbook is slightly cumbersome. In particular, it makes the relationship between the first and second clauses more explicit than I would prefer. To that end, the rewrite I give below is more natural, and also matches more closely with what I think the author had in mind. This is my attempt at the intended meaning of the sentence: What's so obvious to you about this situation? We construct this sentence to make the purpose of the question transparent. The speaker wants to understand the situation from your perspective, but is asking for examples. A: It means to ask a question that can be answered with one word: in this case, obvious. The question above is essentially "How obvious is your opinion to you?". To create a "one word answer", it is often accompanied with an example to clarify the meaning. To give an example: What is the most important feature of this new product? -- OBVIOUS You are an experienced professional. -- OBVIOUS TO YOU How many textbooks do you need to buy for this course? -- NOT OBVIOUS TO ME A: "What's so obvious to you about this situation?" sounds like the person is begging for help with a simple idea or question, trying to make it easy for you to see what is so obvious. Riggio said Giuliani had no idea he was making statements for media he wasn't
