Next, if you are using IIS to host your site, make sure you have PHP-FPM enabled. Some of these things may be outside of your direct control and unfortunately, IIS and PHP have had compatibility issues for some time. Step-by-step solutions for compatibility issues: 1. If you are using IIS there are fixes that are available but they are not 100% guaranteed to work. That being said, I have had good results with these fixes. 2. If you use PHP 5.x, make sure to update to PHP
