Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Developed as a game at its inception, Roblox was originally conceived as an educational tool for children. It is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Founded by David Baszucki and Erik Cassel in October 2004, Roblox originally focused primarily on educational games, such as 2065: The Year of the Future, a computer game described as "the world's first alien invasion simulation", as well as educational toys. Baszucki and Cassel resigned from the company in May 2005. In June 2005, Roblox announced that it had raised \$750,000 in venture capital through a seed funding round led by Early Growth Services. While the Roblox website initially attracted some criticism for being largely inaccessible to users, the site reached an average of 17,000 simultaneous users in mid-2006. In August 2006, Roblox Corporation announced that the company had released a proprietary programming language based on the Lua programming language and designed to expedite the development of new games. Programming games with this language, known as Lua Programming Language (LPL), was initially free for registered users. Roblox has received recognition as a platform for independent game developers, with the platform hosting games such as Moshi Monsters: The RPG, developed by Daniel Wagner and Mike Cook, in addition to game-changers such as Ant Farm, developed by

Charles Cecil. In January 2007, Roblox began allowing non-registered users to play games created by other users. Roblox Corporation subsequently raised an additional \$900,000 in venture capital through a series D funding round led by New Enterprise Associates (NEA) in November 2007. In October 2008, Roblox released its first mobile application for Android,
