R1.part1.rar.Q: Custom Back Button and adding a ViewController I have added a navigationbar and a view controller in my navigation controller. The application is running fine until I added the back button(not the left bar button because I want it as a custom button). I use the following code to set it up: UIBarButtonItem *newItem = [[UIBarButtonItem alloc] initWithTitle:@"TestButton" style:UIBarButtonSystemItemFixed size:CGSizeMake(75, 60) target:nil action:nil]; self.navigationItem.backBarButtonItem = newItem; I have added the following code to the viewDidLoad: [self.navigationController setBackButtonEnabled:NO animated:NO]; Unfortunately the button is not showing. I would appreciate some help in resolving this issue as I have been stuck for a while with it Thank you very much in advance A: If you want a custom button and a back button you can use these functions: // Add a Navigation Bar self.navigationItem.hidesBackButton = YES; // Add a Toolbar self.navigationItem.hidesBackButton = NO; // Set it back to hide it [self.navigationItem setHidesBackButton:YES animated:NO]; // Set it back to show it [self.navigationItem setHidesBackButton:NO animated:NO]; // Set it back to hide it [self.navigationItem setHidesBackButton:YES animated:YES]; //
