External links References Bibliography Category:National days Category:National days Category:February observancesIdentification of novel SNPs in the HLA-DQA1 and DQB1 genes and association with multiple sclerosis in a Japanese population. The HLA class II gene region is a major susceptibility locus for multiple sclerosis (MS). To identify novel, non-polymorphic single-nucleotide polymorphisms (SNPs) in the HLA-DQA1 and DQB1 genes, we designed a primer set to investigate the SNPs in the HLA-DQA1 and DQB1 genes. The SNPs were subsequently found in the HLA-DQA1 and DQB1 gene regions in Japanese patients with MS (n = 55), patients with other neurological diseases (OND, n = 65), and normal healthy controls (n = 158). In the control group, there was no significant difference in the allele distribution of the SNPs. The SNPs associated with
