Not only does she live a highly charged, interesting life as a packed dance studio, she also has this nickname: the "BMA superstar." And it's something she's taken pride in. "It's cool to have people know you by that," Tibbets told CNR's Jeremy Diamond. "I just feel that is what I'm doing and I really enjoy it." And she has a lot to her good about. Tibbets, 31, is a full-time professional dancer. A highly-rated dancer in her domain in Washington, D.C., she has an enviable reputation with previous rights going all the way back to 2007. She also has some early experience with. Fluid Mechanics of neural development of the caudal hindbrain shows that serotonergic neurons are generated during development of the neural tube. This article by Dunbar et al., (2014) 135-142 (2014) indicates that serotonin plays an essential role in the patterning of the hindbrain and that neural serotonergic neurons are generated from epithelial cells which could be neural crest-derived mesoderm. This paper will be beneficial for an understanding of neural development in general. Many cell types such as neuronal and glial cells have to undergo multiple differentiation processes to achieve mature cell types. The specification of one cell type by another is thought to play an important role in the generation of complex tissues such as the brain. This paper focuses on the developmental process of the serotonergic neurons of the caudal hindbrain and deals with the following issues: How many types of serotonergic neurons are generated during development?
