With the EOS R5 C, R5 II and other cameras and accessories, filmmakers and video editors can achieve a professional, all-round image quality workflow with ease. Producing the highest quality images without the need for a large and costly post production facility. EOS R5 C RAW has opened up a range of new camera configurations for filmmakers. Movies can now be shot in 4K with an array of possible camera setups and retained in ProRes RAW, ProRes LT, ProRes 422 and ProRes RAW formats to allow for an extended post production workflow. A powerful, portable plug and play monitor, the Ninja V gives you a set of familiar tools in a lightweight and compact package. Ninja V is the ideal companion for the road warrior or any artist who wants to capture their world anywhere and bring it into the studio. The onboard E10 display gives you a full viewing angle of 160°, and it features a responsive ergonomic design with smaller and thinner dimensions than its predecessor, but with the same power. This is a fully featured video monitor that truly lets you experience your creative world in ways that were not possible on even the largest monitors before, allowing you to explore visual creativity on a new level. Ninja V can monitor up to four devices simultaneously, and it features multiple inputs: SDI, HDMI, S-video and component. The RED Rocket Hybrid delivers the outstanding image quality and reliability of the RED ONE, with full connectivity and upgrades and the most powerful RED EPIC Capture Engine and the most powerful RED EPIC post-production tools available.

A self-imposed Obi-Wan Kenobi, Mr. Yune has been teaching Japanese martial arts to Western actors for three decades, and even wrote the book on the subject. He acts as a constant rebuke to Hollywood for its fetish for an Aryan warrior, but he and his students (who dub their own characters in Japanese) have left an especially profound mark on Naruto Uzumakis not-so-beloved ninja clan. In the 1960s, the only place you could find traditional martial-arts movies was in Japan. Then the real action took place in the streets, in the bars, and ultimately on the screens of the burgeoning American counterculture. The ninja movies Japanese artists invented started off as the story of a guy with an unexplained power, a group of brothers, and then, over time, grew into full-fledged genres with their own codified styles, brawling directors, and serial characterizations. It didn't start that way. In the late '60s and early '70s, as the film industry was trying to figure out how to make money in this brave new world, they started with the stories for which they were most familiar, and then began to adapt them. There are more than three dozen pre-Wario Ninja films, mostly silent. Only one of them, Shinkichi Ishi's 1942 classic Keijo, Tokyo no Jidai (The Battle: Era of the Gods) is staged with more complex cameras. The first live-action Ninja-style movie that wasn't inspired by Eastern art forms was 50 years later; the first one to use frame-accurate timecode was nearly three decades later. It takes a lot of chutzpah to interpolate real martial-arts movements onto a stageful of kung fu extras. 5ec8ef588b
