Win-7 Composition for high school music class 1 Why some random webpages are not downloading  
videos from this page? I can download any other youtube videos successfully. This is the first time  
I'm having this issue. And surprisingly no other youtube video on other websites are affected. I've  
seen that the cause of this issue is due to browser bug, however, I'm using the latest version of  
Chrome browser. Whenever I try to download a video on this webpage - - Chrome displays "Page Not  
Found" error. Sometimes I'm getting any security pop-up message. I've tried the same video file on  
other websites and it successfully download. Also, I used different browsers like Chrome, Firefox,  
Safari and Edge. And I've tried downloading the same file from Youtube directly (just typing the  
video URL on browser address bar) and it works. =====  
===== Update: I have reported the issue to Google.  
Please see the screenshot below - =====  
===== Update 2: =====  
===== Update 3: I've reported this issue to Youtube as  
well. Here is a screenshot of their response. =====  
===== Update 4: I have also reported this issue to Mozilla  
Firefox. Here is a screenshot of their response. =====  
===== This issue is only happening on mobile, at home  
on desktop I'm not facing any issues. Mozilla supports that this issue is due to malware. I have  
performed anti-virus scan on my home computer and it is clean. As per the below scan report, I don't  
find any malicious program installed in my system.
