# Outwit Hub Pro 5.0 Crack REPACK

Just make sure you have the 7-Zip Extractor from "http://www.7-zip.org/" pre-installed, and that you extract the files from your cracked version to the directory where you can access your cracked version without getting a warning. This should be for example in your "C:" directory, so use the 7-Zip Extractor to extract the "proxies.txt" file to the "C:" directory. Also make sure your proxy is not blocking the website you try to scrape, otherwise it won't work. All your settings are stored in a text file (usually in your "Preferences" directory, but it could be in some other directory if you have changed it), and this is where the proxy settings are stored too. This cracked version comes with a cracked and loaded 30x proxy for you to use (see the "Proxies" tab in the Options dialog, as well as the information that it is a 30x proxy), and hopefully the proxy is not blocking websites such as live.com. You will also find a cracked and loaded pre-configured proxy, which comes in the "Preferences" tab of the Options dialog. It will start the scraping process immediately, and will only download the pages you have specified before scrapping. There is also a cracked and loaded profile for the FAST scraper for the initial download of pages. Click "Install outwitHub 5.0 for FREE", and you will be forwarded to the OutwitHub website, and then to the downloading page. Wait for the downloading to complete, and you can then just extract the file "outwitHub\_Pro.7z" to your "C:\Program Files (x86)\OutwitHub\outwitHub\_Pro" directory. You can find this directory from the home screen of OutwitHub.
