Fifa 12 Data3.big [UPD]

Feb 3, 2011 - Ps: I think I exported all the related files: from data3.big. these chunkzip2 files we are ready for faster fifa12 pc editing. I updated to this to let it work (at least that's what I know) I get it What can I do? I tried reinstalling and no! This does not apply to all files, only the ones I exported! I have to find them with a search! This means that if I download all these files that I have exported, I have to find them with a search! But if I reinstall I get the error "error while importing data". I tried this way It does not import.
