They don't come much leaner, and since Photoshop comes in such a fine package, they don't come any cheaper, either. The new tools you need to unleash the full creative potential of your images have arrived. One combines innovative ways to change your images with the powerful features of Photoshop to ensure your images are prepared to master the most demanding clients, producing great results you can be proud of. It's not often that a photography app gets a ratings update. But the latest update to Adobe's free RAW converter app, Lightroom 6.3, is just that. The latest version of the famous Lightroom app, version 6.3, wasn't a major upgrade overall. It brought some smaller tweaks that made the app more user friendly, though you'd have to have been following the development of LR for a while to pick up on the finer points. The first new feature is a significant one. Lightroom had always supported working with RAW files, but it previously had a unique process for doing so. Now, RAW file working has been given its own Tools panel in the main workspace. This panel is easy to access, too. So it seems that Apple has unapologetically begun dominating the smartphone and tablet gaming market with little competition, and yet, the duo of Edge-oriented Microsoft and browser-based Amazon didn't even bother to design their Skype for iPad advertising campaign centered around a signature feature of Microsoft's Windows tablets and laptops. You think Microsoft's developers aren't going to be pissed off at this? Yeah. I don't mean to imply that it will have any impact whatsoever, but those Microsoft developers will have to continue adding features to their app and game development software to stay afloat, as Apple is now doing with iOS.

The point of the comic is that I don't think there is any magic plugin that will make you a designer effectively. If you want to create attractive HTML and CSS, you'll need to have a basic knowledge of HTML and CSS. If you want to create print designs, you'll need some knowledge of print design. If you want to create a web page or a logo, that starts to get a little bit trickier. Over the last three years, Chrome has been working to empower web applications that want to push the boundaries of what's possible in the browser. One such web application has been Photoshop. The idea of running software as complex as Photoshop directly in the browser would have been hard to imagine just a few years ago.
