Jai Hanuman Titler Song For All Where to Download Sanjay khan Jai Hanuman Serial Title Song Vedic AgeQ: How to pull data from an ASMX Web Service? This is my first time making a service call, I have an ASP.NET web service that returns the Headline, stock and a list of shares (images) of the header. This is my first time making a service call so I think I have written some meaningless code, so please be kind. I want to just echo a string (from my local machine) back, so I tried this (I have stripped out some code):

```
[WebMethod] public static List GetStock(string code) { var
connectionString = "Data Source=*.dbf;Initial Catalog=db;User
ID=username;Password=password"; using (var connection = new SqlConnection(connectionString))
{ connection.Open(); string query = "SELECT Headline, [iStockID] FROM Stock WHERE Code=" +
code + " ORDER BY [iStockID] ASC"; using (var command = new SqlCommand(query, connection))
{ command.CommandType = CommandType.Text; command.Connection.Open(); using
(SqlDataReader reader = command.ExecuteReader()) { List stock = new List(); while
(reader.Read())
```
