YTD Video Downloader Pro is portable application that lets you download media from your portable devices like iPad, iPhone, Android phones and tablets. YTD Video Downloader Pro 5 Full version with Crack. USB to DVI cable, easy to go from one to another. This will probably be the last one, then i'll be done with these types of things. HDMI to VGA cable or DVI cable, depending on what is needed. Sparkfun has a nice "quick stuff" list for cables that can be found here: But since I'm no longer going to be using the soldering iron or a soldering gun I'm going to look for a dual-sided wire stripper. Hook up / test 12V battery/power supply 5V battery / power supply for debugging HDMI -> VGA adapter HDMI to DVI adapter HDMI cable HDMI (or DVI) cable into laptop (hopefully) LCD screen The LCD screen currently on my PCB is 320x240 So what I'm going to do next, at this very moment, is to hook up my LCD to make sure it's working. It should be simple, just connect the HDMI cable and do a quick test: If everything works, then I'm going to power up the PCB without the LCD screen and hook up the LCD screen. Next steps Put case on PCB Add components to PCB Fit into enclosure Solder I think the next steps are fairly obvious: Put case on PCB Add components to PCB Fit into enclosure Solder At this point I'm going to be putting the case into a very nice heavy duty cardboard box and putting it on top of my bench (so far, no soldering done): I've been really struggling with the parts of the case, especially the space within the LCD case, as the picture below shows. At this point I got the case on and it's quite heavy: The next steps is to actually put the components on the PCB itself:
